

CLIMATE CHANGE AND SUSTAINABLE DEVELOPMENT SHORT-COURSE REGULAR (WITHIN AUGUST-OCTOBER, EACH YEAR)

INTRODUCTION

The Centre for Climate Change Studies (CCCS) of the Institute of Resource Assessment (IRA) - University of Dar es Salaam (UDSM) is implementing short course training as part of its responsibilities toward promoting better education to the people of Tanzania, Africa, and around the globe, reaching out to the international community. Short course trainings are designed to enhance knowledge and skills development among practitioners and professionals who are working on the ground. The trainings are meant to improve technical understanding and develop competency-based practitioners. From these perspectives, the University of Dar es Salaam, through the CCCS-IRA, is inviting key stakeholders to participate in the **Climate Change and Sustainable Development short course**, which will enhance their skills related to climate change science, vulnerability and impacts analysis, climate change governance architecture, response measures and climate change and sustainable development linkages. The course is suitably relevant to policy and decision makers, practitioners, and all other stakeholders.

OBJECTIVE OF THE COURSE

To enhance the understanding of climate change and sustainable development, through increased knowledge and skills among stakeholders, including policy and decision makers, regulators, practitioners, developers and other affected and interested parties.

TARGET PARTICIPANTS

The target participants are practitioners/ technical staff across levels/sectors in Tanzania, ranging from Government, CSOs and Private sector stakeholders.

AT THE END OF THE COURSE PARTICIPANTS WILL BE ABLE TO UNDERSTAND:

- Introduction to climate change (science, global warming, GHGs, etc).
- Vulnerability, risks, impacts of climate change and loss and damage (Global, national and local/sectoral/crosscutting)
- Multilateral Environmental agreements, International and national/local Climate Change Governance, and Negotiations
- Climate Change Mitigation and GHGs Emissions Trading Systems
- Climate change adaptation and Resilience pathways
- Climate Change and Gender and gender responsive development frameworks
- Mainstreaming climate in planning and decision-making process
- Climate Change and Sustainable Development
