Business School

Oil and Gas Regulatory Framework & Revenue Management for Professionals

Why this training?

An effective and efficient management of oil and gas revenue is a very crucial area of governing the oil and gas sector for amassing benefits from resources' rent for the current and future generations of host countries' citizens. It facilitates the development of the oil and gas sector while managing its developmental implications to other sectors of the economy including trade and thus overcoming petroleum related negative effects. Key stakeholders/professionals engaged in oil and gas are thus required to attend this important training on Oil and Gas Regulatory Framework & Revenue Management to effectively and efficiently manage oil and gas resources and revenue.

Training objectives

To equip participants with knowledge and skills on:

- the structure of the oil and gas sector and its future potentials and climate change related challenges,
- the general oil and gas regulatory framework, its linkage with investment in the industry; and regulations governing the management of sovereign wealth funds;
- fiscal regimes' instruments and their application and effectiveness, transfer pricing and related measures; and
- the management of sovereign wealth from the extraction of oil and gas and related investment opportunities for the generation of more social and financial return.

Coverage

Module 1: Overview of the oil and gas industry .

Module 2: Legal framework of oil and gas, investment in oil and gas, revenue and sovereign wealth management.
